October 2005

It is an absolute pleasure to recommend BASE ARCHITECTURE for commercial and residential design. Shawn Godwin and his team at Base are young, dynamic and very capable architects whose passion for cool, contemporary and practical design oozes out in every meeting and design solution they offered me as their client. In 2005, Shawn was recommended to me by a close friend who himself is a brilliant architect and had worked closely with Shawn at Mirvac. As our business is a specialised obstetric + gynaecological imaging (so+gi) practice, Shawn was the perfect man for the job as he and his wife were expecting their first baby. Shawn was able to take our brief of removing the usual clinical drabness of a medical practice and instead develop a spa like ambience patients could enjoy whilst still feeling like they were in a safe specialist centre. His brilliant use of curves and pods accentuated by award winning lighting helps bring a smile to the faces of our clients as much of their stress disappears in the tranquil ambience he was able to create.

We were on a tight schedule. Shawn clearly took the brief to the next level and was able to design the concept very quickly and intuitively. New customers and returning patients, four years later, continue to comment on how beautiful the design is. Base was able to guide us through meetings with the builder and specialised trades efficiently and seemingly effortlessly. The whole process was completely new to us but was remarkably enjoyable. The impeccable professionalism of Base made it so easy. We had complete confidence in Shawn, his honesty, integrity and design skills. He has great taste in colours, finishes and furnishings.

We have now moved from the successful business relationship to a close personal friendship. We have recommended Base to our family, friends and colleagues. Recently we have been further amazed at the skills of Base as we engaged Shawn to design plans for our new residential home which we hope to commence in the next financial year.

Base architecture can make the ordinary a lot less so.

Yours sincerely,

Dr Stephen Sinnott
Director so+gi (specialised obstetric + gynaecological imaging)
