It is my great pleasure to recommend Base Architecture and Design to any prospective client. In 2005, my business partner and I enlisted the services of Shawn Godwin and his team to create a whole new level of specialist medical facility for our obstetric and gynaecological imaging practice. His brief was to design something different from the ordinary dull medical rooms that have become the standard; a luxurious and relaxing yet highly functional space in which to provide our tertiary level imaging service. Shawn used his design skills very effectively to help us achieve our goal of creating an innovative and elegant space. His vision is evident throughout the facility. More importantly Shawn's commitment to protect our interests and the integrity of the design process was unwavering. He is not only talented from a design standpoint, but he has a keen sense of understanding how a building should work for the client. He had the ability to help us make difficult decisions that kept the project on track while maintaining the integrity of the project. In the end, Shawn delivered a design that met all of our goals – budget, schedule, functionality, context and aesthetics.

Shawn's creative and design talent is on par with the best in the country today, but it is his understanding and respect for our business, unwavering work ethic and professionalism that make him truly unique. It is because of this, that I have entrusted him with my own residential project: a challenging hybrid of old heritage- listed cottage with a modern extension. His design thus far is, not unexpectedly, fabulous. I look forward to a long career with Shawn as my design architect and friend.
